## PREFACE

This volume is a compendium of banking and monetary statistics of the world, as complete as circumstances permit. It has been prepared in continuation of the series of memoranda on *Currency* and on *Central Banks*, published after the First World War, *Commercial Banks*, issued in 1931, 1934 and 1935, and *Money and Banking*, issued regularly each year from 1935 to 1940.

Before the war, the *Money and Banking* was published in two volumes. The first volume contained a general review of monetary developments; the second, summaries of balance-sheets of Central and Commercial Banks. The present edition combines in a single reference book the statistical information included previously in both volumes. Current events are reviewed in the *World Economic Survey*.

The present publication is divided into two parts: Part I, entitled *International Summaries of Essential Data on Currency, Banking and Money Rates*, summarises in nine tables the principal monetary and banking developments in about fifty countries. Most of the tables contain quarterly figures covering the period between the outbreak of war and March 1942; but, in order to maintain the continuity of record with the preceding editions, figures are also given for December 1938. In Part II, *Central and Commercial Banks: Balance-sheet Position and Profit-and-Loss Accounts*, individual accounts of Central Banks and aggregate accounts of Commercial Banks are given for forty-four countries and are carried in most cases up to the end of 1941. The statistics are accompanied by brief notes explaining the data given and summarising recent legislative changes.

The sign "—" is used where a figure is nil or negligible, "..." where figures have not yet been published or have not yet been received, " ." where information is not available or possibly non-existent, and "\*" where figures are provisional or estimated.

## PREFACE

Le présent volume est un recueil, aussi complet que les circonstances actuelles le permettent, des statistiques bancaires et monétaires mondiales. Il fait suite à la série d'ouvrages qui a débuté après la première guerre mondiale par les *memoranda sur les Monnaies et sur les Banques centrales* et qui s'est continuée par les *Banques commerciales* en 1931, 1934 and 1935, ainsi que par les éditions annuelles des *Monnaies et Banques* de 1935 à 1940.

Avant la guerre, les *Monnaies et Banques* paraissaient en deux volumes. Le premier tome contenait un aperçu général des événements monétaires, le second résumait les bilans des banques centrales et des banques commerciales. Les statistiques qui étaient antérieurement partagées entre les deux volumes sont aujourd'hui réunies dans un seul ouvrage de référence. Un exposé des événements se trouve dans la *Revue de la Situation économique mondiale*.

La présente publication est divisée en deux parties. La première qui s'intitule *Résumés internationaux des Données essentielles sur les Monnaies, les Banques et les Taux d'Intérêt*, résume en neuf tableaux les principaux événements monétaires et bancaires dans une cinquantaine de pays. La plupart des tableaux contiennent des chiffres trimestriels pour la période allant du début des hostilités à mars 1942. Afin d'assurer une continuité avec les éditions précédentes, les données afférentes à décembre 1938 sont également reproduites. Dans la deuxième partie, intitulée *Banques centrales et commerciales: Bilans et Comptes de Profits et Pertes*, figurent les comptes particuliers des banques centrales et les comptes globaux des banques commerciales de quarante-quatre pays. Dans la plupart des cas, les chiffres sont à jour jusqu'à la fin de 1941. Les statistiques sont accompagnées de courtes notes qui expliquent les données présentées et résument les changements législatifs.

Le signe "—" indique que le chiffre est zéro ou négligeable, le signe "... " que les chiffres ne sont pas encore publiés ou qu'on ne les a pas encore reçus, le signe " . " que les renseignements ne peuvent être obtenus ou n'existent pas, et le signe " \* " qu'il s'agit de chiffres provisoires ou estimatifs.

A la page 200 se trouve une clé française relative à tous les tableaux internationaux ainsi qu'aux bilans-type utilisés en vue de résumer les comptes annuels des banques commerciales.

<sup>1</sup>Canada, United States, Belgium, France, United Kingdom: not including gold held in Exchange Equalisation and similar funds. At the outbreak of the war, the recorded amount of such gold exceeded \$2,300 million (or 1,400 million old gold dollars; see *Statistical Year-Book of the League of Nations, 1940/41*, p. 201). Subsequently, the Bank of England and the Bank of Canada reserves were transferred to such funds (see individual chapters for these countries).

<sup>2</sup>During the war the gold reserves of many Continental countries have been removed, in whole or in part, from the Continent.

<sup>3</sup>Not including Spain. The last officially reported figure for Spain (April 30th, 1938) was 525 million dollars.

<sup>4</sup>Not including Spain and U.S.S.R.

**Bolivia:** 2 banks. The discrepancy between the figures above and those in the chapter on Bolivia in Part II is due to the fact that the annual accounts are compiled from complete end-of-the-year statements, whereas the quarterly figures are based on summarised periodic returns.

**Brazil:** All banks; number not stated. Source: Directoria de Estatistica Economica e Financiera: Movimento Bancario do Brasil. Col. i: The difference between the total of Col. a-h and Col. i consist of an item called in the original statistics "Outros titulos". **Bulgaria:** 4 banks.

Canada: 10 chartered banks. Chile: 18 banks. The difference between the figures given above and those in the chapter on Chile in Part II are due to the fact that the returns are prepared on different dates. Col. i: Total of cols. a-h. Col. k: Due to foreign banks only. Colom-

bia: The discrepancy between the figures given above and those in the chapter on Colombia in Part II is due to the fact that the end-of-the-year balance-sheets apply to commercial banks only, whereas the quarterly figures apply to all banks, including mortgage banks and savings banks.

## Central Bank of Argentine.

*Gold:* Valued at the rate of 1 peso = 0.29289 gramme of fine gold. *Gold abroad and foreign exchange:* Since September 1937, this item includes "Gold at home, Extension of Exchange Fund". Under this heading, the Bank includes a part of the gold holdings belonging to the Exchange Fund which the Bank was entrusted to import and manage on behalf of the Government (Decree of August 23rd, 1937). *Consolidated treasury bonds:* These bonds were issued at the time of the setting-up of the Central Bank through the conversion of the balance of the Patriotic Loan Bonds held by the "Caja de Conversión" and of Treasury bills held as security for advances by the "Banco de la Nación". The commercial banks take up certificates of participation in these bonds and the Central Bank redeems them at maturity. The certificates may be discounted at the Central Bank; their amount consequently varies with the situation on the money market. *Government debt for fiduciary issue:* This debt is in the form of a non-interest-bearing guarantee bond taken over by the Bank. *National securities:* Government bonds acquired by investment of part of the Bank's capital.

## Commercial Banks.

The statistics compiled by the Central Bank of Argentine relate to approximately 93% of the cash and deposit items of all commercial banks controlled under the Banking Law of 1935. Inter-bank operations are excluded from the statistics. The figures from 1938 onwards are not strictly comparable with those given for 1929 because of the adjustments which have taken place in several items as a result of the banking reforms of 1935.

### 1. Cash.

The amounts shown under (a) consist entirely of gold. Those shown under (b) consist of:

## CENTRAL BANKING.

The central banking position is summarised in three statements:

Table I.—National Bank of Belgium.

*Gold:* Valued up to March 30th, 1935, at the rate of 1 franc = 0.04184 gramme of fine gold; since that date, at the rate of 1 franc = 0.03013 gramme. On June 25th, 1940, only Fcs. 155,000 and on December 25th, 1940, Fcs. 8,190,000 of the gold holdings were in Belgium, the remainder being held abroad. *Foreign exchange and gold values:* This item is stated in the annual reports for 1937 and 1938 to consist of gold, with the exception of a balance of foreign exchange accruing from current transactions (959,483 francs and 236 million francs at the end of 1937 and 1938 respectively). *Due from the "Bank of Issue in Brussels":* This item includes, *inter alia*, the partial countervalue of clearing balances resulting from exports to Germany (see Table II below). *Advances on Belgian public*

securities: Since 1940, this item has been called “Loans and advances”. *Government debt: Balance of old debt:* At the end of 1941, this balance was composed of two items: (1) a Treasury bill amounting to 500 million francs, issued by virtue of the Law of December 27th, 1930, and representing the remainder of the Government debt created by the withdrawal of German notes after the war of 1914-1918; (2) a Treasury bond amounting to 148 million francs, issued in accordance with the Law of July 19th, 1932, as cover for exchange losses suffered in 1931 and amortised each year by means of the yield of securities held by the Bank in a special account (item 10 (b)) and of an allocation of 10% of the Bank's profits. *Treasury certificates:* Credit of 5,000 million francs granted to the Belgian Government on May 10th, 1940. In the Balance-sheet of June 25th, 1940, this item amounted to 2,207 million francs. *Short-term public securities:* Treasury bills handed over to the Bank since May 10th, 1940; on June 25th, 1940, this item amounted to 3,673 million francs. *Public securities:* Securities held in virtue of statutory or legal provisions established before the war. Item 10 (b) represents securities held by virtue of the Law of July 19th, 1932, the yield of which is allocated to the amortisation of the exchange losses suffered in 1931.

Table II.—“Bank of Issue in Brussels”.

The “Bank of Issue in Brussels” was established on June 27th, 1940, by a Decree of the German Military Commander for Belgium and Northern France. It has the authority to issue bank notes in Belgian franc denominations, having legal tender status. In fact, however, no bank notes have been issued.

and the new "Bank of Issue" has in practice become the Banking Department of the National Bank, its primary functions being to manage the clearing account with the German Clearing Office ("Deutsche Verrechnungskasse") and the accounts of the Reich Credit Offices ("Reichskreditkassen").

The "Bank of Issue" published no returns before its Balance-sheet of December 31st, 1940.

*Claims in foreign exchange:* This item includes claims on the Reichsbank and on the German Clearing Office (23 million francs and 945 million francs respectively on December 31st, 1940). *Due from the Reich Credit Offices:* Transfer account: Reichsmark balances on the transfer account ("compte de virement") of the Reich Credit Offices. *Reich Credit Offices' Notes:* This item represents the Reich Credit Offices' notes ("Reichskreditkassenscheine") which have been withdrawn from circulation. *Credits to State and public bodies:* This item is the counterpart of the postal cheque accounts, transferred to the "Bank of Issue" (see item 11 (b)). *Capital paid up:* The total capital was fixed at 150 million francs to be subscribed by the Belgian Commercial Banks; 30 million was paid up. *Current accounts:* National Bank of Belgium: Advances granted by the National Bank of Belgium to the "Bank of Issue" (see Table 1, item 4). *Postal Cheque Office:* The Postal Cheque Office was transferred to the Bank of Issue on August 3rd, 1940. *Other:* Reich Credit Offices: Belgian franc balances on the transfer accounts ("comptes de virements") of the Reich Credit Offices.

**Table III.—Combined Statements of the National Bank of Belgium  
and the "Bank of Issue in Brussels".**

These statements combine the accounts of the National Bank of Belgium and the "Bank of Issue in Brussels". The end of 1940 Balance-sheets have, however, not been published on the same day and, in order to merge the respective accounts, recourse was made to periodic returns of January 2nd, 1941—the date since which the situation of both banks has been made public.

## Central Bank of Bolivia.

*Gold:* Booked, in 1929, at mint parity (1 boliviano = 0.54917 gramme of fine gold), and since 1931 in paper bolivianos valued on the basis of sterling up to June 1941 and thereafter on the basis of the U. S. dollar. The valuation rate applied between December 1936 and September 5th, 1939, was £1 = 80 bolivianos; between the latter date and June 21st, 1941, an undisclosed part of the reserve was valued at £1 = 120 bolivianos and the remainder at £1 = 160 bolivianos; since June 21st, 1941, the whole reserve has been valued at \$1 = 46 bolivianos. Out of the profits arising from the last two devaluations, the following allotments were made (in millions of bolivianos): (1) Devaluation of September 5th, 1939: Strengthening of capital in connection with the nationalisation of the Bank (decreed on August 3rd, 1939), 15.5; compensation to private share holders, 18.8; to National Government, 18.4; to reserves, 0.4; total, 53.2. (2) Devaluation of June 21st, 1941: Redemption of Chase National Bank loan, 68.8; redemption of loan contracted for service on foreign obligations, 50.7; exchange stabilisation, 38.0; redemption of various internal loans, 25.5; administrative expenses, 0.6; total, 183.6. *Government securities:* A rapid rise in the Government debt under this heading occurred in consequence of the hostilities with Paraguay prior to 1936.

## Commercial Banks.

The Summary Balance-sheet covers two institutions carrying on solely commercial banking operations ("Banco Mercantil" and "Banco Nacional"). The figures from 1938 onwards are based on uniform balance-sheets adopted by the "Dirección General de Estadística" and cannot be considered as strictly comparable with those given for previous years, compiled directly from the annual reports of the banks.

## National Bank of Bulgaria.

*Gold:* Valued at the statutory rate (1 lev = 0.01087 g. of fine gold). *Gold foreign exchange:* Under the Stabilisation Act of 1928, the gold foreign exchange was included in the cover reserve in addition to gold coin and bullion. Since September 30th, 1936, no foreign assets are considered as "gold foreign exchange" within the meaning of the Act, and cover is now calculated on the basis of the gold reserve only. *Other foreign exchange:* Including clearing accounts. *Treasury bills:* Rediscounted Treasury bills. *Advances to the Government:* Direct discounts. In virtue of the Law of February 8th, 1937, Treasury bills amounting to 1,000 million leva were transferred from this account to "Government debt". *Government debt:* This item, arising out of advances granted during and after the war of 1914-18, was increased in 1937 (see preceding note). *Investments:* This item includes securities bought in the open market, the amount of which may not exceed 20% of the capital and reserves, and participations. *Current and deposit accounts; Other liabilities:* Clearing accounts appear under these two headings.

## Bank of Canada.

**Gold:** Valued at the current selling price on the London or New York market converted into Canadian dollars at the rate of exchange of the day. An Order in Council (Exchange Fund Order) of April 30th, 1940, provided for the sale of the Bank's gold holdings to the Foreign Exchange Control Board and for temporary suspension of the Bank's minimum gold reserve requirement. The amount of gold sold to the Board on May 1st, 1940, under this Order was 5,888,565 fine ounces, valued at \$225.8 millions. *Sterling and U. S. A. dollars:* This item included up to 1939 small amounts of "Other currencies of countries on a gold standard". By virtue of an Order in Council (Foreign Exchange Acquisition Order) of April 30th, 1940, the Bank sold to the Foreign Exchange Control Board on May 1st, 1940, foreign exchange amounting to \$28 millions. At the end of 1941, the exchange holdings shown under this item were stated in the Bank's annual report to be "made up almost entirely of sterling". **Investment:** *Dominion and Provincial Government securities:* *Short-term:* Maturing within two years. *Other:* Those having a maturity longer than two years. The major part of the increase in this item in 1940 was caused by the purchase from the Foreign Exchange Control Board of \$250 millions of 1-year 1 per cent Dominion Government Notes in connection with the sale of gold and foreign exchange to the Board, referred to above. **Other securities:** Securities held under the provisions of the Bank of Canada Act, Sections 21 (e) and (f), may be securities issued by the United Kingdom, any British Dominion, the United States of America or France. **Other assets and liabilities:** The principal items outstanding in these accounts are cheques in course of clearance and Bank of Canada drafts issued but not presented for payment. Since the war, the volume of such transactions outstanding has tended to increase because of the growth in the receipts and payments of the Dominion Government.

### 3. Bills Discounted and Bought.

The Canadian official statistics do not show discounts separately from loans. They are therefore included in item 7, (2), in the statement below.

### 4. Investments and Securities.

The sums shown for Government securities (item (a) of present group) are composed as follows:

	1929	1936	1937	1938	1939	1940	1941

### 10. Sundry Assets.

These amounts include the Circulation Redemption Fund.

### 14. Profit and Loss, etc.

The Canadian banking statistics do not cover profit and loss accounts. The balance of profit and loss accounts excluded from the returns of the chartered banks has been calculated by taking the difference between total assets and total liabilities (including capital and reserves), which are shown in the official returns. In addition, item (14) includes a small amount of dividends declared and unpaid (1.4, 1.5, and 1.5 millions in 1939-1941).

18. *Deposits.*

The detailed composition of the amounts shown under current accounts (a) in the Summary Table is given below:

	1929	1936	1937	1938	1939	1940	1941
	Dollars (000,000's)						
Sight deposits made by the public in Canada. . . . .	729.3	682.3	699.2	734.1	853.0	1,030.7	1,268.5
Balances due to Governments:							
Dominion Government . . . . .	60.0	25.1	13.1	53.7	129.5	66.2	114.2
Provincial Governments. . . . .	31.6	47.4	39.5	42.5	50.5	66.5	52.8
Total. . . . .	91.6	72.5	52.6	106.2	180.0	132.7	167.0
Grand Total. . . . .	820.9	754.8	751.8	840.3	1,033.0	1,163.4	1,435.5

A large part of "time" deposits by the public in Canada is subject only nominally to notice of withdrawal and consists of "savings" accounts. In practice, cheques are drawn upon "savings" accounts in much the same manner as upon "current" deposits.

The deposits shown under (a) and (b and c) are all held in Canada. "Other deposits" shown under (d) represent deposits made in the foreign branches of Canadian banks. The official statistics do not subdivide these deposits into sight and time deposits.

## Bank of the Republic.

**Gold:** Valued up to April 1935 at the rate of 1 peso = 1.46448 grammes of fine gold; from April 6th, 1935, to November 1938, the valuation of the gold reserve was based on the New York price of gold (\$35 per fine ounce) and the peso exchange rate; since November 19th, 1938, the gold is valued at the rate of 1 peso = 0.50782 gramme of fine gold. **Loans and discounts:** The larger part of the loans and discounts made to the member banks represents operations for the "Caja de Credito Agrario, Industrial y Minero" (about 90% and 81% respectively on June 30th, 1940 and 1941). **Advances to the Government:** **Short-term loans:** Loans up to 90 days without interest. **Loans for National Defence:** Loans without interest granted in 1933-35; in November 1938, 8 million pesos were repaid out of the profit accruing from the revaluation of the gold reserve. **Advances under the Decree of June 21st, 1940:** Loan of 17.5 million pesos, bearing 4%, granted by the Bank to the Government on June 21st, 1940, for financing public works and investments in agriculture and industry; simultaneously with that operation the Bank received a loan from the U. S. Export-Import Bank, amounting to 10 million U. S. dollars. **Advances under Salt Mines Concessions:** Advances bearing 3%, granted in 1931-35 for the purpose of exploiting salt mines. **Other assets:** Including the "Silver Certificates Reserve in silver coinage" held against the silver certificates in circulation (8.4 million pesos on December 31st, 1941). A *per contra* item is included among *Other liabilities*. **Other deposits:** Deposits of foreign banks. **Special Exchange Account:** Account counterbalancing the increase in the gold reserve due to revaluation of gold on April 6th, 1935; it was liquidated on November 19th, 1938, in connection with the establishment of a new basis of valuation of gold reserve and allotted as follows: 8 million pesos to repayment of Government debt (item 5. (b)); 5 million pesos to the Government (item 12 (b)); 3 million pesos for the formation of a Stabilisation Fund (item 15); balance of 1.3 million pesos to the Special Exchange Account. **Stabilisation Fund:** Fund set up by the Law of November 19th, 1938, entrusted to buy and sell Government securities with the object of influencing the money market; on April 2nd, 1940, the powers of the Fund were extended to foreign exchange operations.

## 3. Bills discounted and bought.

The official statistics make no distinction between discounts, loans and advances, nor is Government paper shown separately from commercial paper. Distinction is made, however, between paper eligible for rediscount at the Bank of the Republic and non-eligible paper. The former category is shown under discounts in the Summary Balance-sheet, and the latter under group 7. The composition of the sums given under 3 is shown below:

## National Bank of Czecho-Slovakia.

On March 15th, 1939, the field of activity of the National Bank of Czecho-Slovakia was limited to the territory of the "Protectorate of Bohemia and Moravia" and its name changed to "National Bank of Bohemia and Moravia". *Gold*: Valued until February 17th, 1934, at the rate of 1 crown = 0.04458 gramme of fine gold; from February 17th, 1934, to October 9th, 1936, at the rate of 1 crown = 0.03715 gramme; from October 9th, 1936, to October 1st, 1940, at the rate of 0.03121 gramme; since October 1st, 1940, at the rate of 1 crown = RM 0.10 (equivalent to a theoretical gold content of 0.03584 gramme). *State notes debt balance*: This debt, representing the stamped notes, negotiable cash certificates and current accounts of the Austro-Hungarian Bank, for which the Czecho-Slovak State had assumed liability, was redeemed through a levy on capital and capital increases; in addition, the profit resulting from the revaluation of the crown on February 17th, 1934, (422.3 millions) was applied to the reduction of this item. On September 20th, 1938, the whole item, amounting to 2,004 million crowns, was eliminated in connection with the exclusion of the bank notes of 100 crowns denomination from the issue to be covered by the gold reserve. *Cover for gold liabilities*: On September 30th, 1938, an amount of 336 million crowns of gold was segregated from the ordinary reserve and shown separately under the heading "Gold reserve to cover liabilities in gold". *Other assets*: Including, since 1939, holdings of Reichsmark notes and coin and "floating claims in respect of German liabilities". *Notes in circulation*: Czecho-Slovak currency in circulation outside the so-called "Protectorate" was withdrawn in amounts indicated in the table below (in million crowns):

## "National Bank of Slovakia".

On March 16th, 1939, the Bratislava branch of the National Bank of Czecho-Slovakia took over the whole business of the Bank in the territory of Slovakia. On April 4th, 1939, it was changed into a "National Bank of Slovakia" in the form of a joint-stock company with a share capital of 100 million crowns, of which 51 million crowns were taken up by the Slovak Government and 40 millions by a German banking group. Gold: Presumably valued at the rate of the Czecho-Slovak crown of 0.03121 gramme of fine gold.

## National Bank of Denmark.

*Gold:* Valued at the old legal parity (1 krone = 0.40323 gramme of fine gold). *Loans and advances:* *Crisis Fund:* The object of this Fund, set up on May 1st, 1933, was partly to make advances to banks whose position was endangered by withdrawals of deposits, partly to facilitate conversion operations by purchases of Agricultural Credit Association bonds. *Guarantee Fund Certificate of the State:* *Guarantee Fund; National Bank Bonds of 1936:* By Law of April 7th, 1936, the "National Bank of Copenhagen", whose legal status was that of a privately owned joint-stock company, was transformed, as from May 28th, 1936, into an autonomous institution controlled by the State under the name of the "National Bank of Denmark". In compensation for the share capital of the old Bank — 27 million kroner (item 13) — and for an equal amount of the dividend equalisation reserve belonging to the shareholders (item 15 (c)), the latter received 54 million kroner in 4% bonds issued for this purpose by the new Bank and guaranteed by the State (item 20); these bonds are to be redeemed within 27 years. The balance of the dividend equalisation reserve — 1.4 million kroner — was used, together with an additional sum of 1.3 million kroner taken from the earnings of the current year, for paying a 10% dividend to the shareholders of the old Bank on May 1st, 1936, while the ordinary and special reserve funds (item 15 (a) and (b)) were transferred in full to the new Bank. The capital of the latter, fixed at 50 million kroner (item 13), is guaranteed by the State, this guarantee being represented under the assets (item 9) by a Government certificate, initially of an equal amount. Year by year, funds out of the annual profits are allocated to the Guarantee Fund and the Guarantee Fund Certificate is reduced accordingly.

As the Danish statistics do not show separately the cover for acceptances, a sum equal to the acceptances shown under liabilities has been deducted from the current account advances and carried to item 8 in the Balance-sheet.

Item (b) consists of loans against collateral or personal guarantee.

10. Sundry Assets.	1929	1936	1937	1938	1939	1940	1941
			Kroner (000,000's)

Total . . . . .	194.2	138.0	136.6	150.3	153.3	155.2	175.0

The item "Sundry Debtors" includes the accounts of the mortgage department of the Landmandsbank.

The item "Government Guarantee Certificate" represents a reserve granted by the State to the Landmandsbank; this reserve is included in the Balance-sheet of this bank with its ordinary reserve. Year by year, funds out of the annual profits are allocated to the ordinary reserve of the bank and the Government Certificate is reduced accordingly.

## 16. Due to Banks.

The amounts shown under (a) are composed as follows:

## Central Bank of Ecuador.

**Gold:** Valued up to December 19th, 1935, at the rate of 1 sucre = 0.30093 gramme of fine gold; from December 19th, 1935, to June 13th, 1936, at 0.10032 gramme; from June 13th, 1936, to June 4th, 1940, at 0.08586 gramme; thereafter at 0.06017 gramme. The book value increments arising out of the first two revaluations — 40 and 11 million sucres respectively — were applied mostly towards a reduction of the Government debt to the Bank (see below); the increment resulting from the revaluation effected in June 1940 — 13 million sucres — was allocated to a Stabilisation Fund. **Loans and discounts:** Banks: Rediscounts to banks, including the Mortgage Bank. **Other:** Including direct discounts to the public. **Advances to the Government:** Consolidated advances: This item, amounting to 35.7 million sucres at the end of 1934, was reduced to 18.5 million in December 1935, and to 7.6 million sucres in July 1936 by means of the gold revaluation increments referred to above. New consolidated advances were subsequently granted in 1936 and 1937, and other advances in 1938, 1939 and 1941. **Capital:** The increase in recent years reflects new subscriptions by the Government (5 million sucres in 1940) and the member banks.

## Commercial Banks.

The final accounts for 1941 were not available at the time of going to press (May 1942). More up-to-date monthly returns are reproduced in Part I. The monthly statistics cover all banks in the country (commercial, mortgage and savings banks) and are, therefore, not comparable with the annual Balance-sheets, applying to commercial banks proper. The figures for 1940 are not fully comparable to those for the previous years because of the exclusion of the operations of the mortgage departments of the commercial banks. The items particularly affected by these changes are groups 7 and 18.

## Bank of Finland.

*Gold:* Valued, until December 22nd, 1938, at the rate of 1 markkaa = 0.03789 gramme of fine gold; since then the gold reserve is booked approximately at its purchase value, but it may not be calculated "higher than at a value equivalent to a price of 50,000 markkaa for 1 kilogramme of fine gold" (Article 6 of the Law of December 22nd, 1938)—i.e. 1 markkaa = 0.02 gramme of fine gold. Since December 13th, 1939, all gold and foreign exchange is included in the note cover. *Foreign correspondents:* Up to December 22nd, 1938, balances with foreign correspondents were booked at the par rate of exchange or at even lower rates; since then they are entered at the current market rate or the rate at which they were purchased, whichever is lower. *Foreign bills, bank notes and coupons:* Valued at current rates of exchange. *Inland bills:* Treasury bills falling due within three months' time were made eligible for discount on December 13th, 1939; such bills are included in the note cover. *Rediscounts to banks:* Joint stock banks had recourse to rediscount for the first time since 1933 in the second half of 1939; such rediscounts were repaid in 1940. *Loans on collateral:* The increase in this item in recent years is due to loans to credit institutions against security consisting of bonds (424 million in 1939, 47 million in 1940, nil in December 1941). *Bonds in Finnish and foreign currency:* Bonds of loans issued by the Government or by Finnish financial and industrial undertakings and by municipalities. *Capital:* In December 1938, this item was increased by 250 million markkaa—part of the surplus derived from the revaluation of the gold and foreign exchange holdings. *Notes in circulation:* Up to December 22nd, 1938, this item was not to exceed the total of the Bank's gold reserve (item 1 (a)) and its undisputed foreign credit balances (item 3 (a)) by more than 1,200 million markkaa; since then, the fiduciary issue has been raised to 1,800 million markkaa. Such part of the total of notes in circulation and liabilities payable on demand as was not covered by gold or foreign balances was to be covered by inland and foreign bills and foreign bank notes and coupons (supplementary cover). Since December 13th, 1939, the distinction between the ordinary and supplementary cover has been removed and all assets referred to above were made eligible as cover.

## Bank of France.

**Gold:** Valued during the period covered at the following rates in grammes of fine gold: Until October 2nd, 1936: 0.05895 gramme; October 2nd, 1936 — July 21st, 1937: 0.0441 gramme; July 21st, 1937 — November 12th, 1938: 0.0387 gramme; November 12th, 1938 — February 29th, 1940: 0.02475 gramme; since February 29th, 1940: 0.021006 gramme. The gold held in the Exchange Stabilisation Fund is not included in item 1; disclosed figures of such additional reserves were: 12,502 million francs on December 31st, 1938; 15,772 million francs on May 31st, 1939. On April 20th, 1939, and again on August 3rd, 1939, 5,000 million francs of gold were transferred from Exchange Stabilisation Fund to Bank of France; on March 7th, 1940, 30,000 francs of gold were transferred from Bank of France to Stabilisation Fund. Most, if not the whole, of France's gold reserve was removed in 1940 to places outside the Continent of Europe.

**Foreign Assets:** *Sight funds abroad:* Mainly deposits with central and other banks abroad. *Foreign bills discounted:* Documentary bills to finance export trade. *Negotiable bills and other short-term investments abroad:* Temporary advances to foreign institutions.

**Domestic Bill Portfolio:** *Agricultural bills and warrants rediscounted:* Bills and warrants endorsed by the National Wheat Board ("Office du blé") which were made eligible for rediscount by virtue of the Law of August 15th, 1936. *Bills rediscounted for peoples' banks:* Bills of the "Caisse centrale des banques populaires", made eligible for rediscount by virtue of the Law of August 19th, 1936. *Negotiable bills purchased in France:* Until June 17th, 1938, this item consisted in bills repurchased by the Bank of France for the account of other central banks and the Bank for International Settlements; since that date it includes short-term bills and short-term Government securities purchased in the open market. *Negotiable Treasury bills:* Three-months' Treasury bills negotiable in the market, received in return for gold transferred to the Exchange Stabilisation Fund on March 7th, 1940 (Convention of February 29th, 1940). *Negotiable bills of the Caisse autonome d'amortissement:* Bills given to the Bank by the "Caisse" in 1928 in order to shift from the Bank to the Treasury the loss on Russian bonds accepted as collateral for loans made during the 1914-1918 war (Convention of June 23rd, 1928) and in 1931 in order to relieve the Bank of the loss on its sterling assets (Convention of December 7th, 1931).

**Advances on Securities:** Advances made at the "advance rate" (3% in 1940 and 1941).

**Thirty-day Advances on Treasury Bonds maturing within two years:** Advances made at a rate lower than that charged for ordinary advances against securities (2% up to March 17th, 1941, 1.75% thereafter). In May 1940 such advances reached a maximum of 2,863 million francs.

**Non-interest-bearing Loans to the State:** The loans to the State, which had been fixed at 200 million francs on each renewal of the Bank's charter, were raised to 3,200 million francs in 1928 and to 10,000 millions in 1938 (Convention of November 12th, 1938).

**Provisional Non-interest-bearing Advances to the State:** *Convention of June 18th, 1936:* Articles 1 and 2 of this Convention provided for a maximum advance of 14,000 million francs bearing no interest, for the purpose of redeeming Treasury bills rediscounted by the Bank as they matured. Such bills amounted to 13,833 million francs on June 19th, 1936. Article 3 provided for a maximum non-interest-bearing loan of 10,000 million francs to the Treasury. *Conventions of June 30th, 1937, March 22nd, 1938, and April 14th, 1938:* The Convention of June 30th, 1937, provided for further non-interest-bearing advances to the Treasury for a maximum amount of 15,000 million francs; this maximum was raised to 20,000 million francs by the Convention of March 22nd, 1938, and to 30,000 million francs by that of April 14th, 1938. *Convention of November 12th, 1938:* The total of advances granted under the Conventions of June 18th, 1936, June 30th, 1937, March 22nd, 1938, and April 14th, 1938, amounted to 52,083 million francs on November 14th, 1938. As a result of the application of the book profits of the revaluation of the gold and foreign exchange reserves effected at this date in virtue of the Convention of November 12th, 1938, the total amount was reduced to 20,628 million francs and carried in a separate item on the Balance-sheet of the Bank as advances "redeemable in accordance with the Convention of November 12th, 1938". The remainder of these advances, amounting to 20,473 million francs, was finally cancelled by virtue of the Convention of February 29th, 1940, by application of the increment resulting from a further revaluation of the gold and foreign exchange reserve (17,338 millions) and by transfer of liquid assets drawn from the Exchange Stabilisation Fund (3,135 millions). *Convention of September 29th, 1938, etc.:* This Convention, concluded on September 29th, 1938, and approved by the Decree of September 1st, 1939, provided for temporary advances to the Treasury up to an amount of 25 million francs "in case of general mobilisation"; this maximum was raised to 45 million francs by the Convention of February 29th, 1940, and to 70 millions by the Convention of June 9th, 1940. *Convention of August 25th, 1940, etc.:* By a series of Conventions dated from August 25th, 1940, to April 30th, 1942, advances of 169,000 million francs have been authorised to meet the costs of the German army of occupation.

**Creditors in Current Account:** *Other current accounts and deposits:* This item includes accounts of individuals, commercial banks and public and semi-public organisations such as the "Caisse nationale des depots et consignations". *Central Administration of the Reich Credit Offices ("Reichskreditkassen"):* Current account opened on August 21st, 1940, to the Central Administration of the Reich Credit Offices, established by the German occupation authorities, representing the unspent portion of the occupation tribute.

### Commercial Banks.

The figures in the Summary Balance-sheets are based on the annual statements of the principal deposit and investment banks, Table I showing six deposit banks — i.e., the Crédit Lyonnais, the Société générale pour favoriser le développement du commerce et de l'industrie, the Comptoir National d'Escompte, the Banque nationale pour le commerce et l'industrie (formerly Banque nationale de crédit), the Crédit commercial de France and the Société générale de crédit industriel et commercial; Table II showing two investment banks — the Banque de Paris et des Pays-Bas and the Banque de l'Union parisienne (the latter having absorbed the Crédit mobilier français in May 1932); and Table III giving the total of Tables I and II.

The end-of-the-year Balance-sheet not being available for one bank, the figures for 1940 are provisional. More recent figures for the four principal deposit banks publishing monthly statements are shown in Part I.

1 and 2. *Cash Assets, etc.*

The amounts given under item 2 consist chiefly of balances with banks and sums due from correspondents; they also include small amounts of coupons due for payment.

3. *Bills discounted and bought.*

This item includes chiefly Treasury bills ("bons de la Défense nationale").

7. *Loans and Advances.*

Current accounts include correspondents. In the case of banks which do not show cover for acceptances as a separate item, an amount equivalent to their acceptances has been deducted from current accounts and carried to group 8 of the Summary Balance-sheet. The other loans and advances (7 (b)) consist of guaranteed advances ("avances sur garanties") and contangos ("reports").

## 17. Deposits.

Current and cheque accounts (17 (a)) also include correspondent accounts. The sums given under "other deposits" (17 (d)) represent "accounts payable after collection", etc., where shown separately.

## 19. Acceptances.

Since 1933, the "Banque de Paris et des Pays-Bas" shows "cover for acceptances" under assets, but no acceptances under liabilities. The corresponding figures have therefore been deducted from time deposits and shown under acceptances here.

<sup>1</sup>Big Berlin banks.<sup>a</sup>Including item 14.

\*Provisional.

## Commercial Banks.

The publication of official commercial banking statistics was suspended in 1939.

As in the previous editions, the annual balance-sheets of Big Berlin banks (Berliner Grossbanken) have been combined in an aggregate statement accompanied by notes showing the detailed composition of the most important items. The banks included in the Summary Balance-sheet are: Deutsche Bank, Dresdner Bank, Commerz-und Privatbank, Reichs-Kredit-Gesellschaft, Berliner Handels-Gesellschaft.

The final end-of-year accounts for 1941 were not available in full detail for one bank.

### 5. Participations.

The sums given in the summary tables are composed of permanent participations in banks and banking firms and syndicate participations (*Konsortialbeteiligungen*) as follows:

	1929	1935	1936	1937	1938	1939	1940

Total. . . . .	279	205	210	197	213	191	221

### 6. Due from Banks (Correspondents).

In the annual balance-sheets, the banks' "advances to banks, banking firms, savings banks and other credit institutions" are included with other advances on current account. In the Summary Balance-sheet, this item has been carried to group 6 and added to "nostro" balances, which represent balances accruing in the ordinary course of banking transactions. (They do not include sums due after more than three months.) This division is shown on the following page:

## 6. Due from Banks (continued).

Total . . . . .	1,763	305	273	297	312	238	262

The bulk of the "nostro" balances are due within seven days.

## 7. Loans and Advances.

The sums given under (a) in the Summary Balance-sheet represent "debtors in current account", less cover for acceptances. The latter item is not shown separately by the banks, but amounts equal to the acceptance liabilities shown in the balance-sheets have been deducted from "debtors" and carried to group 8 of the Summary Balance-sheet. Current-account debtors, as shown in the annual reports, include advances to credit institutions; these advances have been carried to group 6 of the Summary Balance-sheet.

The amounts shown under (b) represent contangos and other advances to the Stock Exchange, reimbursement credits and other loans and advances. The detailed composition of loans and advances in the years under review is shown in the following table:

(a) Debtors in current account:	1929	1935	1936	1937	1938	1939	1940

## 8. Cover for Acceptances. — See note to previous group.

## 12, 13 and 14. Capital, Reserves and Undivided Profits.

The capital account involves double counting in respect of the bank participations included under assets.

## 16. Due to Banks (Correspondents).

Sums due to foreign banks are not shown separately, but the bulk of the credits obtained with other banks for the account of customers (*seitens der Kundschaft bei Dritten benutzte Kredite*) probably represents liabilities to foreign banks.

*Summary of Profit-and-Loss Accounts.*1. *Gross Profits.*

The composition of gross profits according to the sources from which they are derived is shown below:

	1929	1935	1936	1937	1938	1939	1940
			Reichsmarks (000,000's)				
Net interest from discounts and loans. . . . .	227	133	145	154	166	179	200
Commissions . . . . .	244	139	148	166	177	187	181
Profits from investments and participations . . . . .	9	11	11	9	7	6	5
Total. . . . .	480	283	304	329	350	372	386

The first item represents the net balance of interest earned on discounts, loans and advances after deduction of interest paid on deposit accounts; some banks include this latter item under expenses. The sums for total gross profits as shown above may be incomplete in certain years insofar as the banks follow the practice of making allowance for depreciation of their investments, participations and outstanding credits before disclosing their profits.

11. *Directors' Fees, etc.*

This item consists only of the directors' share in profits (*Gewinnanteil des Aufsichtsrates*). Their salaries (*Bezüge des Vorstandes*) are included under expenses in item 2 of the Summary Table.

## Bank of Greece.

The publication of the periodic returns was suspended in April 1941.

*Gold:* Up to April 23rd, 1932, valued in stabilised drachmæ (1 drachma = 0.01953 gramme of fine gold; 375 drachmæ = £1); subsequently not shown separately from foreign exchange in the Balance-sheets. *Treasury bills:* Bills issued to the order of Greek industrial firms. *Advances to the State:* Non-interest-bearing advances granted by the Bank to the Government, under arrangements with foreign creditors, out of the funds accumulating in the International Financial Commission's deposit account at the Bank (included under item 16 (a) (3)). These deposits represent the sums paid into that institution's account by deduction from the revenues securing the service of the external debt, and accumulated through the suspension of the transfer of part of the interest on the external debt. *State debt:* Debt arising from the former Forced Currency and other loans and transferred to the Bank of Greece by the National Bank of Greece. The annual payment of 200 million drachmæ for the amortisation of this debt (Agreement of October 27th, 1927, between the Government and the Bank) has been in suspense since 1932. *Bonds of State loans in gold:* Up to the end of April 1933, these bonds formed part of the legal cover reserve. *Other assets:* This item includes, in addition to premises and unspecified accounts, the exchange loss sustained by the Bank in September 1931, as a result of the abandonment by Great Britain of the gold standard (Law of December 31st, 1931); this loss, originally amounting to 175 million drachmæ, had been entirely amortised by the end of 1940. *Current and deposit accounts:* The deposits of the International Financial Commission (see above "Advances to the State") constitute the greater part of sub-item 16 (a) (3), amounting to 3,559, 6,146, 9,029, 11,774 and 12,229 million drachmæ in 1937-1941.

## National Bank of Hungary.

**Gold:** Valued, until December 31st, 1938, at the rate of 1 pengö = 0.26316 gramme of fine gold; from then to September 30th, 1941, at 1 pengö = 0.17544 gramme; thereafter, at 1 pengö = 0.21749 gramme. **Foreign exchange:** For cover purposes: Valued, until December 31st, 1938, at the legal rates; since that date, at the prevailing rates, plus premiums applied to various currencies. **Other:** This item, included under "Other assets" in the published returns, was recorded separately in the Bank's annual reports (remarks relating to the cover of note circulation) until 1935 inclusive, but has subsequently not been disclosed. **Token coins:** Included in the metal reserve in 1929. **Government debt:** (a) *Long-term debt:* The recent rise in this item is due to two measures: (1) In 1933, the Government was empowered by Parliament to borrow up to 100 million pengö from the National Bank and to repay certain private agricultural debts to the banks on condition that the latter would, in turn, employ these sums to reduce their rediscount indebtedness. Total advances to the Government by the Bank under this arrangement amounted, at the end of each year, 1936-40, to 60, 79, 89, 94 and 94 million pengö respectively. (2) In 1938, the Government was authorised to apply for a further credit of 100 million pengö, out of which it would repay its short-term debts to Hungarian banks, in order that the latter, in turn, might decrease their loans from the National Bank. (b) *Short-term advances:* The limit of short-term temporary advances, fixed at 30 million pengö in 1939, was increased to 100 million in 1940. **"Advances to foreign countries":** Advances granted to foreign countries by virtue of the paragraph (g) of article 57 of the Statutes (authorising the Bank to buy and sell foreign bills, etc.). **Other assets:** Including undisclosed reserves of gold and foreign exchange. The increase in this item in 1938 is due to the surplus arising from the revaluation of the gold and foreign exchange reserve. No information is available as regards the increase in 1940 and 1941. **Cash certificates:** The "cash certificates" were issued by the Bank in 1933 to consolidate the foreign credits granted in 1931 by the Bank for International Settlements and certain Central Banks (25.5 million gold dollars). As cover for this liability, the Bank has acquired gold and foreign exchange, subsequently booked under the undisclosed reserve referred to above. The increase in this item in 1938 is connected with the adjustment of the book value of the "certificates" after the revaluation of the gold and foreign exchange reserve. The decrease of this item in subsequent years is due to capital repayment.

## Commercial Banks.

*General note.* The data shown as of December 31st, 1939, include banks operating in the Czecho-Slovak territory occupied in 1938 and 1939. Consequently, the number of members of the Central Corporation of Banking Companies increased by 22 during 1939; during the same period, however, the number of member banks operating in the former territory decreased by 24, the result of these changes being a reduction in total membership to 394. No statistics are available for 1940 and 1941.

## 3. Bills discounted and bought.

Bills rediscounted are maintained under assets and are shown as a separate item under liabilities.

## 7. Loans and Advances.

The sums under (a) include participations, while (b) represents mortgage loans.

## Reserve Bank of India.

The accounting year of the Bank was changed in 1940 from January-December to July-June.

**Issue Department:** *Gold:* Valued at the rate of 13 1/3 rupees = £1 (1 rupee = 0.54918 gramme of fine gold). Up to June 30th, 1940, this item included gold coin and bullion at home and abroad, the latter held at the Bank of England. Shortly after June 30th, 1940, gold held outside India (29 million rupees) was transferred to India. This transfer was effected by exchanging gold held in India by the Reserve Bank on behalf of the British Government with that held by the latter in London on behalf of the Reserve Bank. *Sterling securities:* British Government securities, maturing within five years. The decline in this item in 1941 is connected with the repatriation of India's sterling debt under the Government scheme announced on February 22nd, 1940. *Rupee coin:* This item includes also the one-rupee notes issued by the Government of India under the Ordinance of July 24th, 1940. *Government of India rupee securities:* The increase in recent years is principally the counterpart of the reduction

<sup>1</sup>Excluding banks in Burma since 1937.

in the sterling securities (item 2). By an amendment to the Reserve Bank of India Act which came into force on February 8th, 1941, the previous upper limit to the holdings of rupee securities in the Issue Department was removed. *Notes in circulation:* A distinction between legal tender in India and in Burma was introduced in April 1937. The notes issued by the Bank represent only a part of the currency in circulation, consisting to a large extent of coin, the exact amount of which is unknown.

**Banking Department:** *Balances held abroad:* Cash and short-term securities held at the Bank of England. This item reached 783 million rupees on March 21st, 1940, but fell thereafter in connection with the repatriation of the sterling debt. *Paid-up capital:* Of the total capital of 50 million rupees, 22 millions are allotted to the Government and 28 millions are held by private shareholders. *Reserve Fund:* This was provided by the Government. *Government deposits:* As from July 1938, these deposits are subdivided into Central Government deposits, Government of Burma deposits and Other Government accounts. Agreements with the Government of Burma and with each provincial Government in India provided for the maintenance of a minimum balance by each Government; since April 1st, 1938, the provincial Governments, whose deposits were previously managed by the Government of India, have assumed full responsibility for their balances. *Banks' deposits:* The scheduled banks must maintain balances with the Reserve Bank amounting to at least 5% of their demand and 2% of their time liabilities; the item also includes balances deposited by non-scheduled banks. *Bills payable:* Representing mainly inter-branch liabilities.

## Currency Commission: Legal Tender Note Fund.

The Legal Tender Note Fund is a capital fund administered under the Currency Act of 1927 by the Currency Commission which, in the absence of a Central Bank proper, exercises certain of the functions of such an institution. A Bill providing for the establishment of a Central Bank was introduced in the Dail by the Finance Minister in March 1942. Under this Bill the Currency Commission would be dissolved and its functions taken over by the Central Bank, on which other powers would also be conferred.

The primary function of the Legal Tender Note Fund is to maintain the cover for, and meet the redemption of, all outstanding legal tender notes. Its assets consist of gold or sterling balances or British Government securities. *Gold*: Valued at current price. *British notes and coins*: This item is defined as "money in any form which is for the time being legal tender in Great Britain for unlimited amounts". *Sterling balances*: Sterling balances on "current or deposit account at the London Agency or any Bank in Great Britain or Northern Ireland". *Notes outstanding*: In addition to Legal Tender notes (item 6), the note circulation in Ireland consists of Consolidated Bank notes issued by the Currency Commission to its eight Shareholding Banks. The total issue of these Consolidated Bank notes amounts to £6 million. The total monetary circulation outstanding is given in Part I, Table I.

## Commercial Banks.

The official commercial banking returns, published periodically by the Irish Currency Commission, have been substituted, in the present edition, for the statistics of the *London Economist*, which were used as a basis for the main table on Irish commercial banking given in the joint chapter on the United Kingdom and Ireland in previous editions of this volume.

The official summary returns cover the eight Shareholding Banks of the Currency Commission (of which one is a member of the London Bankers' Clearing House, another has its head office in London and three have their head offices in Northern Ireland) and, in addition, the National City Bank — a subsidiary of the Bank of Ireland, the largest member bank of the Currency Commission. The returns show in separate columns accounts "Within Ireland" exclusive of Northern Ireland (i.e., accounts within the territory formerly known as the Irish Free State) and accounts "Elsewhere". In view of the integration of the Irish and the British commercial banking systems, it is evident that the figures in the columns headed "Elsewhere" and even — thought to a minor extent — the accounts "Within Ireland" overlap with the figures for Northern Ireland and, in some measure, those for England and Wales, given in the chapter on the United Kingdom.<sup>1</sup>

The territorial segregation applied in the statistics of the Currency Commission is, in principle, determined by the location of the bank offices to which the accounts relate, except in the case of the following items:

1. *Cash*.

This item includes cash and balances with London agents and other banks. The territorial segregation depends on the place where the assets are actually held: currency in a bank till is accordingly attributed to the area in which the bank is located and a balance with another bank to the place in which the latter is situated.

<sup>1</sup> The statistics of the *London Economist*, forming the basis of the Summary Balance-sheets for joint-stock banks in Northern Ireland and in England and Wales given in the chapter on the United Kingdom do not segregate the accounts of these banks in the "Irish Free State". The extent of the overlapping cannot, therefore, be accurately ascertained from published data.

## 15. Notes in circulation.

The figures for notes in circulation are segregated according to the jurisdiction to which the note issue appertains. The items attributed to Ireland accordingly include:

(a) All Consolidated Bank Notes: These notes are issued by the Currency Commission to its eight Shareholding Banks under the Currency Act of 1927, their aggregate amount being fixed at £6 million;

(b) Ireland's (i.e., territory known formerly as the Irish Free State) proportion of all Irish (private) bank notes which are still outstanding: These are notes issued by the private banks before May 6th, 1929, since when they have been gradually replaced by the Consolidated Bank Notes. It is

believed that a substantial part of such private bank notes still outstanding represents "dead" notes (destroyed or lost and unlikely to return from circulation).

The Currency Act of 1927, which terminated the private note issues of banks in the Irish Free State, did not affect the position of the private banks in Northern Ireland, where they continue to possess right of issue under the laws of the United Kingdom.

The publication of periodic returns has been suspended since October 20th, 1935; that of the annual balance-sheets since 1940. *Gold*: Valued, up to October 5th, 1936, at the rate of 1 lira = 0.07919 gramme of fine gold; subsequently at 0.04677 gramme. *Domestic bill holdings*: Discounts as from June 30th, 1936, are limited to the credit institutions which are subject to the control of the Banking Inspectorate; private discounts have been liquidated. *Loans to the Treasury*: As authorised by Article 21 of the Decree of December 31st, 1936. *Advances to the "Istituto per la Ricostruzione Industriale"*: Amounts advanced in 1929 to the "Istituto di Liquidazioni", founded in 1926 to take over from the "Sezione autonoma del Consorzio per Sovvenzioni su valori industriale" the frozen assets of the "Banco di Sconto" and other institutions; amounts advanced since 1933 are to the "Istituto per la Ricostruzione Industriale" set up in 1933, the second section of which ("Sezione Smobilizzi") took over the accounts of the "Istituto di Liquidazioni" and the industrial participations of credit institutions. The amounts shown represent mainly advances to these latter institutions. *Claims on Government for gold deposited abroad*: This item, described in the original statement as "oro depositato all'estero dovuto dallo Stato", represents claims on the Government for gold deposited in London during the negotiations for War loans in 1915-1918. *Notes in circulation*: The amounts shown do not include 80 million lire of Government notes in circulation at the end of 1929 and subsequently withdrawn, nor do they include the new Government notes issued since 1935. *Other deposits: Government*: Sight deposits of the Treasury and, since 1930, deposits of the Public Debt Amortisation Office (in 1939). *Other*: Fixed deposits on Treasury and other account.

## Commercial Banks.

Two separate Summary Balance-sheets are given:

1. Table I is based on the official statistics in the "Bollettino Mensile di Statistica dell'Istituto Centrale de Statistica". The statistics cover ordinary joint-stock banks and financial companies. They do not, however, present a complete balance-sheet. The balance-sheet totals in this Table do not, therefore, coincide with the totals of the items given. The publication of banking statistics was suspended in 1939.

2. Table II summarises the annual balance-sheets of three big commercial banks ("Banco di Roma", "Credito Italiano" and "Banca Commerciale Italiana").

## Bank of Japan.

**Gold:** Valued up to August 25th, 1937, at the rate of 1 yen = 0.75 gramme of fine gold, thereafter at 0.29 gramme. **Foreign Exchange Fund:** Amount of gold reserve released on July 23rd, 1938, for shipment abroad to establish a revolving foreign exchange credit. The Fund was liquidated in February 1942. **Subsidiary coin:** Including, in addition to silver, nickel and copper coins, small amounts of silver bullion (14,544 yen since 1937). **Bills discounted:** Including, in addition to ordinary discounts, special discounts authorised by the Government in April 1927 with a view to accommodating credit institutions experiencing difficulties. **Advances to the Government:** The outstanding amount was highest in August 1937 (233 millions), after which it was reduced by the profit accruing from the revaluation of the gold reserve. **Other assets:** Including "suspense payments" amounting to 4.4, 15.0, 11.4, 13.4 and 14.8 million yen in 1937-1941. **Notes in circulation:** The fiduciary note issue, amounting to 120 million in 1929, was increased on July 1st, 1932, to 1,000 million, on April 1st, 1938, to 1,700 million, on April 1st, 1939, to 2,200 million and on April 1st, 1941, to 4,700 million yen. **Government deposits:** The division into "current account" and "other" is not given in the 1940 annual report; however, in the statement for the last week of December 1940, "current accounts" amounted to 422 million, and "other" to 708 million yen. **Other liabilities:** Including "suspense receipts" amounting to 74.5, 79.6, 99.1, 136.9 and 231.0 million yen in 1937-1941.

## Commercial Banks.

In the absence of complete end-of-year balance-sheets, the available banking statistics are summarised in the adjoining table covering:

1. **Ordinary Banks:** This group represents the commercial banks proper and covers approximately the same institutions as those included in the end-of-year accounts in the Summary Balance-sheets published in the previous editions of this volume.

2. **Special Banks:** This group includes the following semi-public institutions: the Yokohama Specie Bank, the Hypothec Bank of Japan, the Industrial Bank of Japan, the Bank of Taiwan, the Bank of Chosen, the Chosen Industrial Bank, the Hokkaido Colonial Bank and 19 "agricultural-and-industrial" banks, while excluding the Bank of Japan. Most of these banks raise their funds largely through the issue of debentures.

<sup>2</sup> July.

<sup>3</sup> From particulars available for the "ordinary" banks and the Treasury Deposit Bureau, it would appear that these "other securities" represent to a very large extent bonds of local Governments and debentures of the "special" banks.

3. *Savings Banks*: Excluding Post Office Savings Bank, for the deposits of which see under "Treasury Deposit Bureau".

4. *Treasury Deposit Bureau*: This institution, which is attached to the Japanese Ministry of Finance, invests the deposits received by the Post Office Savings Bank from the public.

## Bank of Latvia.

At the beginning of October 1936 when the gold basis was abandoned and the lat was linked to sterling at the old rate of 25.22 lats = £1 implying a devaluation of some 40%, the book value in lats of the Bank's gold and foreign exchange reserve was written up accordingly. While the gold parity of the lat remained legally undetermined, the gold reserve was booked in terms of paper lats on the basis of the fixed sterling rate up to the outbreak of the war. In September 1939, the lat was linked to the U. S. dollar at the fixed rate of 5.4 lats = \$1.

## Bank of Mexico.

Owing to changes made by the Bank of Mexico in the form of its Balance-sheet, the figures for 1929 are not strictly comparable with those for 1936-1941. *Metallic reserve:* This item includes gold and silver bullion and coin. Between April 27th, 1935, and December 28th, 1938, the gold and silver were valued on the basis of \$(U.S.)1 = 3.60 pesos and thereafter at 4.99 pesos. In terms of the old gold content of the peso (0.75 gramme of fine gold), the value of the gold reserve at the end of the years 1929 and 1936-1941 was as follows (millions of pesos): 14.5, 54.8, 28.4, 34.1, 37.8, 56.2, 55.7. *Advances to the Government:* The balance of the Treasury was liquidated on November 22nd, 1940; simultaneously the Bank was authorised to increase its portfolio of Government securities (item 6). *Metallic coins:* In addition to the notes and silver certificates, the monetary circulation consists of silver coins amounting at the end of the years 1936-1941 to 184, 218, 273, 278, 331 and 308 million pesos (see Part I, Table I).

## Commercial Banks.

The figures for 1935-1937 are not fully comparable to those for subsequent years because of the changes in the presentation of the banking statistics in 1938.

The Summary Balance-sheet includes all private credit institutions in the country. Their number is not stated.

## The Netherlands Bank.

**Gold:** Valued up to March 31st, 1940 (Law of March 16th, 1940), at the rate of 1 gulden = 0.6048 gramme of fine gold; since then at 0.49776 gramme. The increment of about 222 million gulden resulting from the revaluation was allotted as follows: (1) 7.6 million gulden written off the claim on the Government for losses incurred on sterling reserves (Law of May 27, 1932) — item included in "Other assets"; (2) 6.3 millions allocated to the reserve funds of the Bank; (3) 132.5 millions, "to be used for a purpose to be indicated by law", transferred to the account of the Treasury in the books of the Bank; (4) 75.6 millions transferred to the Exchange Equalisation Fund created by the Law of September 30th, 1936. **Bill holdings:** Domestic: In 1940 and 1941, mostly Treasury bills bought directly from the Treasury. Foreign: Since May 6th, 1940, this item (then amounting to 750,000 gulden) represents claims on Germany. **Loans:** Including, as from April 3rd, 1934, a loan to the Netherlands Indies amounting to 58 million gulden at the end of March 1940. **Investments in securities listed by the Amsterdam Stockbrokers' Association:** The major portion of the Bank's capital and reserve funds is invested in such securities, the remainder being invested in other securities included, together with the participation in the Bank for International Settlements (1.2 million gulden), in item 10 of the Summary Table. **Other assets:** Including, in 1937-1939, the claim on the Government for losses incurred on its sterling reserves which was written off on March 31st, 1940 (see above under "Gold"). Since May 6th, 1940, the "Other assets" have chiefly represented claims on Germany. **Sight deposits:** Sub-division according to the last weekly return of March each year. **Other liabilities:** Including small amounts of Bank post bills in addition to profit-and-loss balance, pensions fund and sundries.

### Commercial Banks.

The Summary Balance-sheet covers the following principal commercial banks: Rotterdamsche Bankvereeniging, Amsterdamsche Bank, Twentsche Bank, Incasso-Bank and Bank-Associatie, merged with the Incasso-Bank in 1936. The Nederlansche Handel-Maatschappij, the operations of which were largely conducted in the Netherlands Indies, has been omitted because its Balance-sheets for 1940 and 1941 cover operations in the mother country only, and are therefore not comparable with those for previous years.

## Reserve Bank of New Zealand.

*Gold:* Valued at its face value in New Zealand currency (£ N.Z. equals £ sterling). *Sterling exchange:* Exchange eligible as cover for notes and other demand liabilities, valued at the rate £100 sterling equals £ N.Z. 124. *Advances: Primary Products Marketing Department:* The advances under this heading include a deficit in respect of the guaranteed price for butter and cheese accumulated prior to the war; the remainder is accounted for by the fact that payments are made to suppliers before receipt of the purchase price from the United Kingdom Government. *Other:* Advances on account of the Government housing program and for general purposes made against the issue of Treasury bills to the Bank. It is stated in the Annual Report of 1941 that the Government, before March 31st, 1941, had paid off all advances under this heading other than those for housing purposes. *Investments:* Long-dated Government securities. *General Reserve Fund:* In accordance with Section 2 of the Reserve Bank of New Zealand Amendment Act, 1936, the amount of £500,000, shown in 1935 under the heading *Capital*, was transferred on April 1st, 1936, to the General Reserve Fund, increasing the total of the latter to £1,500,000.

## Commercial Banks.

The series given up to June 1935 was discontinued after that date. The new series is not directly comparable with that for the preceding years. The commercial banking statistics given in this table refer exclusively to the assets and liabilities of the banking offices *within* New Zealand and exclude capital and reserve accounts.

## Bank of Norway.

The publication of periodic returns and annual reports was suspended in 1940.

*Gold at home and abroad:* This part of the Bank's gold holdings is valued at the legal parity (1 krone = 0.40323 gramme of fine gold) and serves as primary cover for the note issue. *Temporary investment in gold:* This item, representing foreign balances provisionally placed in gold, which is not included in the primary cover reserve, is booked at purchase price — i.e., approximately at actual exchange value. *Domestic securities:* By the Law of June 30th, 1936, amending the Bank Act of 1892, the Bank was expressly authorised to undertake open-market operations by means of purchase and sale of securities, even if such purchase and sale would entail losses to the Bank. Item 6 (b) includes mainly bonds of mortgage and municipal banks and certain other semi-public credit institutions. *Other advances:* Including an item of the original Balance-sheet called "Mortgage bonds, shares and deposits with other banks", serving as collateral for loans. *Notes in circulation:* By the above-mentioned Amendment Law of June 30th, 1936, the maximum limit for the note issue of the Bank, previously fixed at 250 million kroner in excess of the book value of the gold reserve in the vaults of the Bank, was increased to 325 million kroner above that reserve.

15. *Cheques and Drafts in Circulation.*

The sums given in this item of the Summary Balance-sheet consist of post bills and notified cheques.

16. *Due to Banks (Correspondents).*

The sums shown as due to banks abroad include creditors in foreign currency as follows:

	1929	1934	1935	1936	1937	1938	1939
			Kroner (000,000's)				
Due to banks abroad . . . . .	41.3	11.9	12.8	18.3	28.2	23.1	35.9

<sup>1</sup>Figures for 1939 not available.

This table is a summary of the accounts of the private banks, as given in the official *Boletín Trimestral de Estadística* and *Memoria de la Dirección General de Estadística*, 1941, as far as they were available when the present chapter was written in May 1942. No details are available with regard to the number of institutions covered by the above table. The accounts of the two Government institutions — the "Oficina de Cambios" and the "Banco Agrícola del Paraguay" — are, however, excluded. The banks keep two separate accounts, one in Paraguayan gold pesos and one in Paraguayan paper pesos.

## Bank of Poland.

**Gold:** Valued at the legal parity (1 złoty = 0.16879 gramme of fine gold). **Treasury bills discounted:** The maximum amount of Treasury bill holdings was fixed at 10% of the commercial bills portfolio. **Advances on collateral:** The maximum amount of loans against collateral was raised in February 1936 from 20% to 30% of the total amount of the Bank's bill portfolio. **Securities purchased:** The rise in this item since 1935 was due to the authorisation given to the Bank by a Law of March 27th, 1935, to purchase securities up to 150 million złoty, instead of only 10% of its capital and Reserve Fund as formerly. Accordingly, with a view chiefly to stimulating the market for agricultural bonds, agricultural bills and acceptances of the Acceptance Bank amounting to 91 million złoty were converted in 1936 into mortgage bonds and bonds of the Acceptance Bank and transferred from the Bank's bill portfolio to the security holdings. **Advances to the Government:** The maximum amount was fixed at 100 million złoty. **Participations:** The maximum amount of participations was raised by 3 million złoty in February 1936, in order to finance the construction of a new grain elevator at Gdynia. **Capital and Reserve Fund:** In June 1936, the capital was reduced to 100 million złoty and the Reserve Fund to 89 millions by the re-purchase from the Treasury of 50 million złoty of shares and 25 millions of reserve stock with the object of enabling the Government to mobilise these investments. **Sight liabilities:** The sundry liabilities shown under (c) include balances due to foreign correspondents and, since 1936, foreigners' blocked accounts. The amounts of these foreign liabilities are not shown separately.

## Bank of Portugal.

Owing to changes made in 1931 in the form of the Bank's Balance-sheet, returns since that year are not strictly comparable with those for 1929. *Gold:* In 1929 valued at the 1911 gold content of the escudo (1 escudo = 1.6259 grammes of fine gold); from June 9th, 1931, to October 10th, 1940, at the rate of 1 escudo = 0.06657 gramme of fine gold (110 escudos = £1 gold sterling); since October 10th, 1940, at market price. Valued at the 1931 parity, the gold reserve amounted in 1929 to 209 million escudos. *Foreign correspondents and currencies:* Including in 1940 and 1941 unspecified amounts of "other reserves". *Foreign securities:* These securities, comprised in "Sundry securities" in the weekly returns, were shown separately in the annual reports up to 1939. *Domestic Government securities:* Including up to 1939 Portuguese Government bonds in foreign currencies, comprised in the legal cover reserve and shown in the Bank's Balance-sheets together with "Foreign correspondents and currencies"; such securities amounted to 242 million escudos in 1939. Since 1940, these bonds, converted into an internal issue, are included in the Bank's securities portfolio. *Government debt:* The fall in the amount of Government debt is due mainly to repayment out of the revaluation profit of the gold reserve in 1931. *Gold agio:* This item represented in 1933-1939 the difference between the official price at which the gold stood in the Bank's books and the market price actually paid for it since the suspension of the gold standard on September 21st, 1931. It was liquidated on October 10th, 1940, in connection with the revaluation of the gold reserve at the market price. *Capital and reserve funds:* Part of the revaluation profit in 1931 was used to raise the nominal value of the capital of the Bank and to strengthen its reserve funds.

## National Bank of Roumania.

**Gold:** Valued up to November 6th, 1936, at the rate of 1 leu = 0.009 gramme of fine gold; from November 6th, 1936, to May 18th, 1940, at 0.00652 gramme; from May 18th, 1940, to March 31st, 1941, at 0.00435 gramme; since March 31st, 1941, at 0.00474 gramme. **Foreign exchange:** For cover purposes: Foreign gold exchange, eligible for the statutory cover reserve. **Other:** Total of the following items of the Bank's Balance-sheet: "Other exchange", "Foreign exchange reserved for payment of imports and other payments" and "Exchange available on various clearing accounts" (17,115 million lei on December 31st, 1941). **Commercial bills:** Current trade bills. **Agricultural and urban bills:** Bills not conforming with ordinary provisions as to eligibility for discount; shown separately since the last quarter of 1932. **Treasury bills:** Held as cover for losses incurred by the Bank in respect of agricultural and urban credits (Law of April 7th, 1934). See *Commercial Banks 1925-1939*, page 183 and *1929-1934*, page 96. **Government debt:** (a) *Old debt:* On February 7th, 1929, date of the Stabilisation Law, this debt amounted to 4 milliard lei; (b) *Temporary advances:* A temporary advance of 2 milliard lei, immobilised since 1932, was repaid on November 6th, 1936, out of the profit accruing from the revaluation of the gold reserve. A new advance of 2 milliard lei was granted in 1937. **Other assets:** Mainly unspecified "sundry accounts" which increased from 5445 million lei at the end of 1940 to 21,608 million lei at the end of 1941, presumably reflecting advances to the Government necessitated by the war. The total of 26,928 million lei shown at the end of 1941 in the summary table includes an amount of 4566 million lei (on "Transitory accounts") representing the difference between the book value as per March 31st, 1941, of the Bank's gold and foreign exchange holdings and their book value at the lower rates of valuation subsequently applied by virtue of three decrees of April 1st, 1941, reducing the exchange premium on "strong" currencies and adjusting accordingly the accounting price of gold. **Other liabilities:** Mainly "sundry accounts" of unspecified nature.

## Sveriges Riksbank.

**Gold:** Valued at the statutory gold parity (1 krona = 0.40323 gramme of fine gold). As from January 31st, 1940, the Bank is, however, authorised to express its gold holdings at the market value for the purpose of calculating the limits to its note issue. Prior to January 31st, 1940, the reserve as shown in item 1 (a) consisted of gold held in Sweden and, up to an amount of 15% of the total gold reserve, of gold held abroad. Additional gold held abroad (item 1 (b)) was not included in the gold reserve and counted only as "secondary" cover. As from January 31st, 1940, the gold reserve consists of all gold belonging to the Riksbank. **Foreign exchange:** Valued somewhat below actual exchange rates. **Domestic Government securities:** The increase since 1938 is due to the financing of State purchases abroad of essential raw materials for storage in Sweden, as well as the financing of other Government operations for purposes of national defence. **Exchange Difference Account:** The differences between the book and purchase prices of gold and foreign exchange bought after 1931 were debited, and differences between the book and sale prices credited, to this account. **Other assets and liabilities:** Including, among assets, various "Installment Loans" from special funds administered by the Bank, and among liabilities, a reserve called "Installment Loan Fund".

## Commercial Banks.

**General note.** Owing to changes effected in the official banking statistics in 1935, the figures for 1938-41 are not entirely comparable with those for 1929. The classification of items remains the same, but accounts of individual banks have in some cases been placed under different headings. In particular, a large part of the sums previously included under "Sundry Assets" has been transferred to other groups of assets.

## 3. Bills discounted and bought.

Treasury bills are included under inland bills in portfolio. Items 3 (b) and (c) include bills re-discounted. Rediscounted inland and foreign bills are shown separately on the liabilities side in item 18.

## 18. Rediscounts and other borrowings by the Banks.

The mortgage bonds included under this item are issued by one of the banks — "Stockholms Intecknings Garanti Aktiebolag" — which holds a position between that of a mortgage institution and that of a commercial bank. The borrowings of the banks against their own securities or securities received as collateral for loans are excluded and are shown outside the Balance-sheet. The totals of these items follow.

## National Bank of Switzerland.

*Gold:* Valued until October 6th, 1936, at 0.29032 gramme of fine gold per franc; from October 7th, 1936, to May 30th, 1940, at 0.215 gramme; since May 31st, 1940, at 0.20535 gramme. *Foreign assets serving as cover:* Since 1938, exclusively U. S. A. dollar exchange. *Other:* Foreign exchange other than U.S. dollars. *Domestic bill portfolio:* "Rescriptions": In 1929, discounted bills of the Confederation, Federal Railways, cantons and municipalities; since 1938, the amounts shown under "rescriptions" represent advances granted to the Confederation, the Federal Railways and the cantons, the bills of the communes being included in the domestic bill portfolio, item 4 (a). *Loan Fund securities:* Securities of the "Caisse de Prêts" of the Confederation created in 1932 with a view to granting credits against bills of exchange, covered by securities, deposits, letters of credit, savings certificates and other paper. *Loans on collateral:* Loans callable within ten days constitute the bulk of total loans and may serve as note cover. *Public securities:* Securities purchased by the Bank on its own account and comprising mainly Federal Railway, "Caisse de Prêts", cantonal and cantonal bank bonds. *Exchange Equalisation Fund:* The Fund, constituted in October 1936 out of the revaluation profit, was liquidated on April 30th, 1940. The total of 533 millions was allotted partly to the Federal Government in payment of extraordinary military expenditure (250 millions) and public works (75 millions), partly to the cantons (150 millions), partly to the National Bank (58 millions). *Other assets:* Including the difference between the official valuation of the gold reserve (215 milligrammes = 1 franc) and the purchase price of gold, amounting to 31.3, 30.4, 44.0 and 10.7 millions in the years 1936-1939. *Capital:* Total share capital is 50 million francs. *Deposit accounts:* Interest-bearing deposits.

## Commercial Banks.

The statistics as compiled in the present statement include, in 1940, 27 cantonal banks, 7 big banks and 215 local banks. The figures for 1936-1940 are not fully comparable to those for 1929, in consequence of the introduction in March 1935 of the new form of balance-sheet prescribed by the regulations in execution of the Federal Law of November 8th, 1934, on Banks and Savings Banks.

## Central Bank of the Republic of Turkey.

**Gold:** Valued at the rate of £T.1 = 6.61518 grammes of fine gold. The increase in the gold reserve in 1940 was connected with the receipt of a loan granted to the Turkish Government on January 8th, 1940, by the British and French Governments and amounting to the equivalent in gold of £15 million sterling, calculated at the rate of 168 shillings per ounce of gold. The gold, actually delivered at Angora, was deposited by the Turkish Government at the Central Bank. The gold reserve recorded in the returns of the Bank rose accordingly by £T.78.1 million on February 10th, 1940, an equal amount on Government deposit account being shown simultaneously under liabilities (item 14 (b) (1)). In May 1940, the Central Bank was authorised to make advances to the Treasury (item 8 (c)) up to a maximum of £T.250 million against security of this gold during a period extending to the end of the first year following the termination of the present war. **Advances:** This item comprises small amounts of advances against gold and foreign exchange, and mainly advances against securities. **Securities:** Securities

under (a) represent those eligible as note cover and under (b) those not so eligible. *Advances to the Government: Treasury bonds against fiduciary note issue:* Treasury bonds delivered to the Bank at its foundation in 1931 in counterpart of the Government note issue; these bonds bear interest at 1% and are amortised, *inter alia*, by a 1% levy on the general, subsidiary and local budget; since 1935, the proceeds of this charge have been used by the Bank to purchase Government securities. *Advances on gold; Sight deposits in gold:* See above under "Gold". *Notes in circulation:* Excludes notes held by the Bank as till money.

## Commercial Banks.

The Summary Balance-sheet covers 34 national joint-stock banks (including the Agricultural Bank of the Republic of Turkey), the Bank of Salonica and 7 foreign banks publishing separate accounts of their transactions in Turkey. The Table excludes the Ottoman Bank which does not publish separate accounts of its operations in Turkey.

No more recent banking statistics were available at the time of going to press (May 1942).

1. *Cash.*

In 1936-1939 item (b) consisted exclusively of inland notes, the balances with Central Bank presumably being included under 6.

In 1940 item (b) is composed as follows: Inland notes: 47.5, Balances with Central bank: 5.8.

3. *Bills discounted and bought.*

The proportion of foreign bills is not known.

## South African Reserve Bank.

**Gold:** All gold held on December 28th, 1932, the date on which gold payments were suspended, as well as that bought since, appears at the statutory price of £3 17s. 10½d. per standard ounce (£1 = 7.32238 gramme of fine gold). **Foreign exchange:** Since 1934, all foreign-exchange holdings are converted into South African pounds at the rate of £100 7s. 6d. South African for £100 British sterling. **Balances with overseas Central Banks:** The increase in 1941 is due to a larger balance maintained with the Federal Reserve Bank of New York. **Balance employed under the guarantee of the Bank of England:** The balance represents the amount held on the London short-money market. **Foreign bills discounted:** These bills consist mainly of British Treasury bills. The reduction in this item in 1941 is connected with the repayment of a Union Government loan which fell due in London. **Investments:** These consist entirely of Union Government stocks. **Gold Premium Account:** This item represents the difference between the standard price at which the gold stands in the Bank's books and the market price actually paid for it since January 1933. Under the Currency and Exchanges Act of 1933, the profits made on such operations belong to the Government. Since 1939, the balance is not shown separately in the official comment on this item. It is, however, stated in the annual reports that the balance of this account increased by £2.3 million in 1939, by £6.2 million in 1940 and by "about" £15 million in 1941. **Notes of other banks in circulation:** This item represents the balance of the liability assumed in July 1924, by the Bank, under the Currency and Banking Act, for all notes issued by the commercial banks outstanding at that date.

## Commercial Banks.

The Summary Balance-sheet gives double columns for the years 1929 and 1941: the columns marked A for 1929 and 1941, and the single columns for other years, show the aggregate amount of the assets and liabilities, within and outside the Union, of all banks operating in South Africa; the columns marked B include only the accounts of offices situated within the Union.

## Bank of England.

## A. ISSUE DEPARTMENT.

**Returns:** The only statements published by the Bank concerning its position are the weekly returns showing, in a very summary form, the position each Wednesday. The table above is therefore based on the returns for the last Wednesday of each year.

**Gold:** Valued up to February 28th, 1939, at the legal parity of 85 shillings per fine ounce (£1 = 7.32238 grammes of fine gold); since March 1st, 1939, at market price, which fluctuated until September 6th, 1939, when it was fixed at 168 shillings per fine ounce. The change in gold reserve in 1939 is associated with internal gold transfers between the Bank of England and the Exchange Equalisation Account: (1) On January 6th, 1939, £200 million of gold (at legal parity) were transferred from the Bank to the Exchange Account; (2) on March 1st, 1939, about £5.5 million (at current

price) from the Exchange Account to the Bank; (3) on July 12th, 1939, £20 million from the Account to the Bank; (4) on September 6th, 1939, £279 million from the Bank to the Exchange Account.

*Fiduciary issue:* The alterations in the maximum limit of the fiduciary issue are as follows during the period under review: November 1928 - July 29th, 1931: £260 million; August 5th, 1931 - March 29th, 1933: £275 million; April 5th, 1933 - December 9th, 1936: £260 million; December 16th, 1936 - November 10th, 1937: £200 million; November 17th, 1937 - January 12th, 1938: £220 million; January 19th, 1938 - November 30th, 1938: £200 million; December 7th, 1938 - January 4th, 1939: £230 million; January 11th, 1939 - February 22nd, 1939: £400 million; March 1st, 1939 - August 30th, 1939: £300 million; September 6th, 1939 - June 5th, 1940: £580 million; June 12th, 1940 - April 23rd, 1941: £630 million; April 30th, 1941 - August 27th, 1941: £680 million; September 3rd, 1941 - November 26th, 1941: £730 million; December 3rd, 1941 - April 15th, 1942: £ 780 million; and since April 22nd, 1942: £830 million. The cover of the fiduciary issue is formed by: (a) *Silver coin*; (b) *Government debt*: This item is an old outstanding debt for which no bonds are held as security, but which is inscribed in the records of the Treasury; (c) *Other Government securities*: This item consists of any sort of direct obligation of the British Government. These may be long-term securities, Treasury bills or Ways and Means Advances; (d) *Other securities*: These securities have served in the past as collateral for that part of the £14 million of fiduciary issue not covered by "Government debt", as well as for that part of the fiduciary note issue which the Bank was authorised to undertake in place of the lapsed country banks' issues. The composition of this small item is left to the discretion of the Bank.

## B. BANKING DEPARTMENT.

*Reserve:* The Notes held in the Banking Department constitute together with Gold and silver coin (which is composed almost entirely of silver coin) what is known as the "reserve". The "ratio" or "proportion" is the proportion of this "reserve" to deposits.

*Government securities:* This item represents direct obligations of the British Government, and includes long-term securities, Ways and Means Advances to the Exchequer, and such Treasury bills as the Bank has purchased on the market on its own initiative. This item reflects the Bank's "open-market policy".

*Other securities:* Discounts and advances consist entirely of commercial and Treasury bills discounted by the Bank for its clients, or accepted as collateral for advances to discount houses, private customers and bill brokers. *Securities* include securities other than direct British Government issues with or without the guarantee of the British Government, commercial bills — domestic and foreign — purchased by the Bank on its own initiative, and any balances the Bank may hold with other central banks.

*Public deposits:* This item includes, in addition to the home accounts of Government departments and funds, the accounts of the National Debt Commissioners, and since 1932 such sterling balances of the Exchange Account as are not invested in Treasury bills.

*Other deposits:* *Bankers' deposits* are, for the greater part, those of the London clearing-banks, though they may include the deposits of any British bank doing business mainly in the United Kingdom. This item, together with the "reserve" and "ratio" referred to above, are looked on as indices of conditions in the money market. *Other accounts* include mainly the deposits of English banks whose principal activities are outside the United Kingdom, those of other central banks, colonial banks, merchant bankers, discount houses, issuing houses, the Indian Government, colonial Governments and the accounts of the Bank's private customers.

## Commercial Banks.

Four separate Summary Balance-sheets have been compiled:

1. Table I — Joint-stock Banks in England and Wales.
2. Table II — Joint-stock Banks in Scotland.
3. Table III — Joint-stock Banks in Northern Ireland.
4. Table IV — Three Leading London Discount Houses.

The final end-of-the-year accounts for 1941 were not available at the time of going to press (May 1942). Up-to-date returns of London Clearing Banks are reproduced in Part I.

1 and 2. *Cash Assets, etc.*

The combined sums shown for the first two items of the Summary Balance-sheet include the following: (a) "Cash in hand" consisting of coin, bank and currency notes and balances with the Bank of England; (b) balances with, and cheques in the course of collection on, other banks; (c) money at call and short notice. The balance-sheet form employed for the statistical summaries of the *Economist* distinguishes between (c) and the total of (a) and (b) wherever (c) is shown separately in the published accounts. It is, in fact, shown separately by all the leading banks throughout the period under review. In the case of the banks not showing money at call as a separate item, the total of (a), (b) and (c) has been included in the first item of the statement below:

I. *Joint-stock Banks in England and Wales.*

Total (corresponding to the sums shown in Summary Balance-sheet). . . . .	6.2	7.2	7.0	5.8	6.0	9.9	12.9

### 3. *Bills discounted and bought.*

The figures given for "bills discounted and bought" do not represent the total bill holdings of all the banks, as some of the minor banks include Treasury bills in their figures for Government securities (item 4 (a) of the Summary Balance-sheet). In addition, a few banks do not show discounts separately from loans and advances, and in such cases they are included in item 7 of the Summary Balance-sheet.

### 4 and 5. *Investments and Securities; Participations.*

The banks do not give full details of the composition of their investments. A few of the minor banks in England and Wales do not show Government securities separately in their published accounts. In such cases, these are included under 4 (b) of the Summary Balance-sheet. As mentioned above, a minor portion of the sums shown under (a) consists of Treasury bills not shown separately by some banks. The "other investments" are mainly gilt-edged and do not, as a rule, include stocks, shares and debentures of industrial companies. The sums shown in item 5 of the Summary Balance-sheet for England and Wales represent the investments in affiliations of the "Big Five". They consist mainly of capital participation in Scottish and Irish banks, and to a less extent in foreign and other auxiliary financial institutions.

### 6. *Due from Banks.*

Sight balances with, and the cheques in course of collection on, other banks are reported only by the London clearing-banks and are included in their cash assets. Correspondent accounts are, as a rule, merged with loans and advances under assets and with deposits under liabilities in the published statements of the joint-stock banks.

### 7. *Loans and Advances.*

As already mentioned, this item includes discounts not shown separately by some of the minor banks, and part of the correspondent accounts.

### 9 and 10. *Premises and Sundry Assets.*

Premises are not shown separately in the statistics of the *Economist*, but they constitute practically the whole of the joint sums shown in the balance-sheet summaries.

### 13. *Reserve Funds.*

In addition to the ordinary reserve fund shown in the Summary Balance-sheet, other reserves are maintained to meet emergencies. These other reserves are included under deposits in the published statements. Moreover, additional resources are concealed by the fact that the premises and the investments of the banks are booked below their actual market value.

### 15. *Notes in circulation.*

The small note circulation shown in the Summary Balance-sheet for England and Wales refers exclusively to the Isle of Man, which is not governed by the English currency legislation.

### 17. *Due to Banks.*

The correspondent accounts as a rule are not shown separately, but are merged in the deposits in the published statements of the banks.

### 18. *Deposits.*

The banking statistics as regularly published in English sources do not show current accounts separately from deposit accounts. The report of the Macmillan Committee gave these details for the deposits of the London clearing-banks for the period January 1919 - March 1931, and a continuation of these series is published currently in the Bank of England *Statistical Summary* and in the League of Nations *Monthly Bulletin of Statistics*. The division of total deposits into current accounts and deposit accounts for the years covered by the Summary Balance-sheet is shown below:

	Monthly averages (December)						
	1929	1935	1936	1937	1938	1939	1940
	£ (000,000's)						
Current accounts . . . . .	957.7	1,140.1	1,287.9	1,284.1	1,256	1,398	1,770
Deposit accounts . . . . .	815.1	924.4	1,011.9	1,026.3	997	1,043	1,030
Total . . . . .	1,772.8	2,064.5	2,299.8	2,310.4	2,253	2,441	2,800

### 19. *Acceptances and Endorsements.*

The greater part of the sums given represents bills accepted by the banks on behalf of their customers. These are almost entirely foreign bills accepted on behalf of home importers.

*Summary of Profit-and-Loss Accounts.*

Some of the minor English joint-stock banks are omitted from the profit-and-loss statistics of the *Economist*, on which the Summary Balance-sheet is based. The banks included are, however, fully representative, the aggregate of their capital and reserves constituting over 99% of the total capital and reserves of all the banks included in the Summary Balance-sheet. The profit-and-loss statistics for the banks in Scotland and Northern Ireland are complete.

*1 and 2. Gross Profits and Expenses.*

As most of the banks in the United Kingdom adhere to the practice of deducting working expenses and income tax before disclosing their profit, these items have been excluded throughout. In recent years, the banks have disclosed their profits "after making appropriations to contingency accounts out of which provision has been made for bad and doubtful debts." It is impossible to tell from this vague phrase to what extent depreciation of assets has been covered out of earnings and to what extent out of undisclosed reserves. The amount shown as profits is entirely at the discretion of the directors.

It is evident, then, that the sums shown under 1 in the Summary Balance-sheet do not represent gross profits in a true sense and are not comparable with the corresponding figures given in the profit-and-loss summaries for other countries.

*3. Reserved for Pension Funds.*

This item of the Summary Balance-sheet is headed "Staff" in the statistics of the *Economist* and includes all allocations for the benefit of the banking staff, which are shown separately by the banks.

*4. Depreciation.*

As mentioned in the note to item 1 above, the banks do not show depreciation of investments in their published accounts.

*6 and 12. Sums carried forward.*

The amounts shown in the summary for Scottish banks include the "Rest" (i.e., the Reserve Funds) of the Royal Bank of Scotland.

*10. Dividends.*

The dividend figures given include a certain proportion of income tax not deducted from the sums distributed to shareholders by a number of banks.

## Federal Reserve Banks.

**Gold:** Valued up to January 30th, 1934, at \$20.67 per fine ounce (\$1 = 1.50463 grammes of fine gold); subsequently at \$35 per fine ounce (\$1 = 0.88867 gramme of fine gold). The Gold Reserve Act of January 30th, 1934, transferred the title to the gold stock of the Federal Reserve System to the U. S. Treasury, so that from that date amounts shown under this heading represent only gold held by the Treasury. In December 1929, the gold reserve was composed as follows: (a) Gold with Federal Reserve agents and Federal Reserve Board: \$2188 million; (b) Gold coin and bullion: \$264 million; (c) Gold certificates: \$332 million; (d) Redemption Fund with U. S. Treasury: \$73 million; (e) Gold held abroad: nil.

**Bills:** *Bills discounted secured by U. S. Government obligations:* This item represents mainly re-discounts for and advances to member banks and small amounts to non-member banks and to individuals, partnerships and corporations against collateral of securities issued or guaranteed by the U. S. Government. *Other bills discounted:* Including advances to Federal intermediate credit banks and to individuals, partnerships and corporations under special legislation which has now expired, as well as ordinary re-discounts for member banks. At times, this item comprised loans on gold to foreign central banks. *Bills bought in the open market:* This item represents (1) dollar bankers' acceptances purchased from bill dealers or banks, either outright or resale agreements and (2) acceptances payable in foreign currencies purchased from foreign central banks and guaranteed by them.

**Industrial Advances:** Advances authorised by the Federal Reserve Bank Act of June 19th, 1934. The Federal Reserve banks may, under this Act, discount or buy from "any bank, trust company, mortgage company, credit corporation for industry or other financing institute" obligations maturing within five years, entered into for the purpose of advances to industrial and commercial enterprises. The financing institution must itself advance at least 20% of the working capital or must be responsible for at least the same percentage for any loss suffered by the Federal Reserve bank. In exceptional circumstances, the Federal Reserve banks may make direct working capital advances to established private industries. The aggregate amount of credit which may be outstanding at any time is limited to the combined reserves of the Federal Reserve banks, plus amounts paid to the banks by the Treasury for this purpose.

**Securities:** *U. S. Government securities* are those purchased in the open market and reflect the System's open-market policy.

**Uncollected Items:** Sum of "transit items", "exchange for clearing-house" and "other cash items".

**Other Assets:** Including five groups of miscellaneous assets shown separately under the heading of "all other assets" in the original statement, and bank premises.

**Total Balance-sheet:** Excludes notes held by Federal Reserve banks other than issuing banks (42, 33, 30, 33, 33, 32 and 36 millions in the years 1929 and 1936-1941).

**Reserves:** This item includes obligatory reserves, "surplus" under sections 7 and 13b of the Federal Reserve Bank Act, and reserves "for self-insurance" and "for losses".

**Notes in Circulation:** (Federal Reserve notes): Amounts shown are net; they exclude: (1) notes held by issuing Federal Reserve banks and branches; (2) notes forwarded for redemption; (3) notes held by the Federal Reserve banks other than issuing banks. They include, however, notes held by the Treasury.

**Deposits:** *Other deposits* include, in addition to "officers' cheques", "Federal Reserve Exchange drafts" and "all other" deposits.

**Other Liabilities:** This item represents mainly profit-and-loss accounts.

## Commercial Banks.

Three separate Summary Balance-sheets are given:

1. Table I summarises the statistics covering all commercial banks members of the Federal Deposit Insurance Corporation (all national banks, all State (commercial) banks and trust companies, all stock savings banks, insured industrial and Morris Plan banks, insured private banks engaged in deposit banking, insured trust companies, branches of foreign banks engaged in deposit banking and branches of American and foreign banks in the United States' possessions). These statistics are based on completely uniform methods of classification imposed by the Federal Deposit Insurance Corporation and are, therefore, more homogeneous than those summarised in Table II.

2. Table II is based on the statistics published by the Comptroller of the Currency and comprises all active banks in the United States (national banks, State commercial banks (including trust companies and stock savings banks) and private banks reporting to State banking departments). Whereas the statistics of the Federal Deposit Insurance Corporation have been compiled only since 1934, those compiled by the Comptroller of the Currency and reproduced in the preceding editions of this memorandum cover the whole inter-war period.

3. Table III summarises the statistics of the Board of Governors of the Federal Reserve System and relates to "All Member Banks".

In addition to the statistics reproduced in Tables I and II, reference may be made here to a special table "Ownership of United States Government Securities, direct and fully guaranteed", published in the *Federal Reserve Bulletin*, July 1941, page 664. This table shows the reported or estimated amounts of direct and guaranteed United States Government Securities held by different groups of investors from 1916 up to 1940.

## Bank of the Republic of Uruguay.

Under the Law of August 14th, 1935, the note issue of the Bank was separated from its commercial banking activities. In order, however, to eliminate the double entries of certain items consequent upon the separation of the Issue and Banking Departments, a summary (Table II) has been prepared showing the position of the Bank according to a simplified scheme.

**Gold:** Valued up to August 14th, 1935, at the rate of 1 peso = 1.55615 grammes of fine gold; between August 14th, 1935, and January 12th, 1938, at 1 peso = 0.70953 gramme; thereafter at 1 peso = 0.58502 gramme. In the 1935-1937 Balance-sheets of the Issue Department, the gold and silver reserve was shown in terms of old pesos, the surplus resulting from its revaluation in terms of new pesos being shown as a separate item. **Bank of the Republic:** Article 19, Law of January 2nd, 1939 (items 2 (a) and 16 (c) of Table I): Under this heading the Bank includes that part of the note cover which, according to legislative provisions, is constituted by the liquid assets of the Banking Department. The maximum amount of such assets, fixed at 35 million pesos by the Law of August 14th, 1935, was increased to 60 million pesos by virtue of the Law of January 2nd, 1939. In the statements issued in 1935-1937, this item was described as "Article 10 of the Law of August 14th, 1935"; in those issued in 1938 as "Article 4 of the Law of January 18th, 1938". **Notes issued:** In order to arrive at the net amount of notes in circulation, it is necessary to deduct notes held in the Banking Department (item 7 (c) of Table I) and notes deposited ("*en custodia*") with the Clearing-house Department and amounting to 9.7, 13.5, 17.5, 10.1, 12.2, 11.1 and 10.7 million pesos at the end of 1935-1941. **Capital:** The increment resulting from the revaluation of the gold stock effected in accordance with the Law of January 12th, 1938 (17 million pesos), was used to increase the capital of the Bank and reinforce its reserve funds. **Finance Ministry — revaluation increment:** This item represents part of the increment (26 million pesos out of the total of 49 millions) resulting from the revaluation of the gold and silver reserve under the Law of August 14th, 1935, which was transferred to the Government's deposit account and used for financing public works spread over a period of three years.

## Commercial Banks.

## Central Bank of Venezuela.

The Central Bank of Venezuela, established by the Law of September 8th, 1939, began its operations in October 1940. The note issue privilege of the private banks was abolished, while the liability for their notes was assumed by the Central Bank which simultaneously took over that part of their gold serving as cover. The decline in items 1 and 15 of Table II (Commercial Banks) in 1940 and 1941 and the increase in items 1 and 10 of Table I (Central Bank) reflect these transfers. The data on gold and notes contained in the two tables are combined below.

*Gold:* Valued at the rate of 1 bolivar = 0.29032 gramme of fine gold. *Credits to former issue banks:* This item corresponds to that part of the note issues taken over from the private banks, which was in excess of the amount of gold ceded by them to the Central Bank. In accordance with Article 87 of the Law of September 8th, 1939, these credits bearing no interest are to be paid off in five years; if part thereof is still outstanding at the end of this period, the former issue banks will have to pay an interest rate higher by one point than the rediscount rate of the Central Bank of Venezuela.

The discount rate was fixed on May 1st, 1941, at 2½%.

## Commercial Banks.

The Summary Balance-sheet covers seven national banks (Banco de Venezuela, Banco Caracas, Banco Venezolano de Crédito, Banco Mercantil y Agrícola, Banco de Maracaibo, Banco Comercial de Maracaibo and, since 1938, Banco Industrial de Venezuela) and five foreign banks (Royal Bank of Canada, National City Bank of New York, Bank of London and South America, Banco Holandés Unido and, since 1937, Banco Alemán Antioqueño; the last-mentioned bank was closed in June 1942).

The first six national banks were issuing notes prior to the establishment of the Central Bank of Venezuela in 1940.

## National Bank of Yugoslavia.

Owing to changes introduced in the Bank's Balance-sheet in 1931 on the occasion of the stabilisation of the currency, the returns for 1931 onwards are not strictly comparable with those for previous years. *Gold:* Up to June 28th, 1931, valued partly at the pre-war parity of the dinar and partly on conventional rates. Since the Stabilisation Law of May 11th, 1931, the gold reserve has been valued at the legal rate (1 dinar = 0.0265 gramme of fine gold). The Decree of January 15th, 1935, reduced the cover requirements of the Bank from 35% to 25% and authorised the Bank to write up the whole value of its gold and foreign assets by 28½% in calculating its cover ratio. *Foreign exchange:* Since September 1936, no foreign exchange has been included in the legal cover reserve. *Government debt:* (a) *Old debt:* This item was reduced on June 28th, 1931, through the payment by the Government of 1,400 millions in cash and through the use of part of the profit accruing from the revaluation of the gold reserve (770 millions); moreover, under the law setting up the National Bank, profits derived by the Government from its share holdings in the Bank are allocated each year to the repayment of the Government debt. (b) *Temporary advances:* The legal maximum is fixed at 600 million dinara. (c) *Ministry of Finance:* Advances authorised by the Decrees of August 24th and September 16th, 1939. (d) *Defence bonds discounted:* Bonds discounted by virtue of the Decree of November 18th, 1939. *Securities:* Government securities bought by the Bank in the open market (Article 12, paragraph 1, of the Statutes).

## Commercial Banks.

Commercial bank statistics are not available for recent years in fuller detail than that shown in Part I. (For figures relating to earlier years, see preceding editions of the volume.)
